

Press release

Toulouse, 25 february 2026

Eqwal continues its growth in the Netherlands with the acquisition of Voetcomfort.

Originally founded as an orthopedic shoemaking company by Rob and Ivanka Witteveen, Voetcomfort quickly evolved as it recognized the importance of a comprehensive approach to care. Driven by a constant desire to improve the quality of life of its patients, the company has gradually transformed itself to more fully address issues related to foot health.

Since 2013, Voetcomfort has brought together renowned specialists such as podiatrists, compression therapists, and pedicurists to offer multidisciplinary and personalized care. By recruiting qualified and certified staff, Voetcomfort contributes every day to improving patients' walking comfort and overall well-being.

This partnership fully aligns with Eqwal's strategy, which aims to strengthen its expertise in the field of Patient Care and expand its presence in Europe. The integration of Voetcomfort enables the group to consolidate its offering of specialized care while benefiting from strong local roots and recognized expertise in the Netherlands.

« We are very pleased to welcome Voetcomfort to Eqwal. This acquisition perfectly illustrates our ambition to strengthen our presence in Europe while building on strong local expertise. The experience and commitment of Voetcomfort's teams in foot care enhance our offering and enable us to provide increasingly comprehensive and innovative solutions for patients..»

Jean-Pierre Mahé, CEO of Eqwal
