Eqwal strengthens its presence in France with the acquisition of Prestaco

Founded in 2018, Prestaco supports healthcare facilities, medico-social organizations, and individuals with their medical equipment needs. Under the leadership of Driss Hammoudi, the company has developed recognized expertise in this field and provides comprehensive support throughout the entire equipment lifecycle, including equipment rental and sales, installation, maintenance, delivery, user training, disinfection, as well as device monitoring and traceability.

Thanks to its local presence in Nancy, responsiveness, and quality of service, Prestaco has built lasting relationships of trust with healthcare professionals and patients by providing high-performance, reliable, and tailored medical equipment solutions, thereby contributing to their comfort, safety, and independence in their daily lives.

This collaboration with Prestaco will enable Eqwal Patient Care France to roll out an anticipated orthotics and prosthetics offering in the Lorraine region. With Prestaco joining the Group, Eqwal continues its commitment to supporting patients over the long term by providing tailored solutions that help improve their quality of life every day.

"We are delighted to welcome Prestaco to Eqwal. Its strong regional presence as a key player in medical equipment and home care is a real asset in the continued development of our Patient Care business in France. We would like to thank Driss Hammoudi for his trust and look forward to starting this new collaboration."

Jean-Pierre Mahé, CEO of Eqwal
